## EXPERIENCE

### Freelance Backend Developer

📅 07/2023 - Present 📍 Philippines

- Developed custom backend solutions for various clients using Python Django and Node.js.
- Delivered projects on time and within budget, ensuring client satisfaction and repeat business.
- Achieved a 30% increase in client referrals through exceptional project delivery and customer service.

### Senior Backend Developer

#### Tech Innovations Inc

📅 06/2019 - 11/2022 📍 Makati, Philippines

- Designed and developed scalable backend services using Java Spring Boot for a high-traffic e-commerce platform.
- Led a team of backend developers in delivering RESTful APIs that supported multiple frontend applications.
- Implemented database optimizations, reducing query response times by 30% and improving overall application performance.
- Integrated third-party services and APIs to enhance application functionality and user experience.
- Implemented microservices architecture successfully, resulting in a 40% improvement in scalability and a reduction in system complexity, particularly during peak traffic periods.
- Conducted code reviews and mentored junior developers, fostering a culture of continuous improvement and knowledge sharing.

### Junior Backend Developer

#### Software Solutions Co

📅 05/2017 - 02/2019 📍 Quezon City, Philippines

- Assisted in backend development using Node.js and Express.js for a real-time messaging application.
- Participated in system architecture design and API documentation efforts.
- Implemented unit tests and conducted integration testing to ensure code quality and reliability.
- Resolved production issues and performed root cause analysis to prevent recurrence.
- Implemented caching strategies that reduced server response time by 20%, enhancing application performance and scalability.

### Backend Developer Intern

#### Digital Ventures

📅 05/2016 - 03/2017 📍 Pasig, Philippines

- Assisted in backend development using Python Django for a data analytics platform.
- Contributed to the design and implementation of RESTful APIs to support frontend applications.
- Learned database management techniques, including MySQL and PostgreSQL, to optimize data retrieval and storage.
- Improved API response times by 25% through optimization techniques and query performance tuning.

## SUMMARY

Seasoned **Senior Backend Developer** with over **7 years** of experience designing and implementing scalable backend solutions. Skilled in Java, Python, and Node.js, with proficiency in database management and RESTful API development. Proven track record of leading development teams, optimizing application performance, and delivering robust backend architectures. Passionate about leveraging technology to solve complex problems and drive business growth.

## SKILLS

Java	Python	Node.js
Spring Boot	Django	Express.js
MySQL	PostgreSQL	MongoDB
RESTful API	PHP	Laravel

## EDUCATION

### Bachelor of Science in Computer Science

#### Bulacan State University

📅 01/2014 - 01/2016 📍 Bulacan, Philippines

## PROJECTS

### E-commerce Platform Backend

Designed and developed RESTful APIs for an e-commerce platform using Java Spring Boot, supporting millions of transactions per month.

### Data Analytics Backend

Built backend services in Python Django for a data analytics tool, enabling real-time data processing and visualization.
